

5 FACTS ON PVC BLOOD BAGS

1/5

#UNBREAKABLE

PVC is unbreakable

This property makes it possible for drones to deliver and drop blood bags in remote areas where blood is urgently needed.

2/5

#LIFE-SAVER

Before 1950, fragile blood containers made of glass resulted in the deaths of countless civilians.

Robust PVC blood bags revolutionised blood storage and transport saving the lives of millions of people.

3/5

#49DAYS

PVC ensures the much-needed 49 days shelf life of the blood

Blood banks depend on the longevity of these bags, especially for patients with rare blood types or during emergencies such as natural disasters.

4/5

#CLEAN

PVC blood bags allow doctors and nurses

to make use of sterilised blood bags that are more durable than anything else on the market.

5/5

#AFFORDABLE

PVC blood bags are affordable

The victim of a car accident can require as much as 100 pints of blood. Blood bags must be accessible for all and be held to the highest standards.
